

## Make Your Own Map!

Try making a map from your house to a nearby evacuation shelter.

### Example Hazard Map

A hazard map contains information such as evacuation shelters, nearby rivers, and dangerous places.

### Let's look at a hazard map of the area where you live!

- Check the location of your house and nearby evacuation shelters!  
For an earthquake or heavy rain, find an appropriate evacuation shelter for each situation.
- What route will you take to each evacuation shelter?  
Are there any dangerous places on your route, such as rivers or cliffs?
- Is there a hospital, convenience store, and public telephone nearby?

Please draw a map including your house, evacuation shelters, nearby hospitals, public telephones, etc.
